mothers' milk bank

COVID-19 Information for Donors

Please give immediate notice to OMMB:

If you have *cared for, lived with, or otherwise had close contact with* individuals diagnosed with or suspected of having COVID-19.

- There will be a 28-day deferral (period in which we cannot accept milk) on donations.
- This also applies to healthcare workers who are in contact with COVID-19 patients.

If you *have been diagnosed with or have been suspected of having* COVID-19 yourself, please contact OMMB, even if your symptoms have resolved.

- Milk donation will be deferred for 7 days prior to symptoms arising and for 21 days after your diagnosis.

OMMB's doors will be locked, and staff will be present, for the remainder of this outbreak. See below for more information about dropping off milk at our downtown location and all other depot sites across the state.

We encourage everyone to follow guidance from public health officials as we all do our part to respond to this unprecedented challenge.

Please remember that our mission is to serve premature and critically-ill infants.

Our deferral period on donations is to ensure their safety.

The current recommendation is to continue providing breastmilk to your own baby if you contract COVID-19.

In an attempt to reduce our donors' exposure to healthcare facilities and to limit your need to leave your car, our depot sites will be arranging to meet you outside for drop-offs.

- Please call the facility and give an expected time of arrival.
- Upon arrival, please call the facility again to let them know you have arrived.
- If it is not necessary to exit your car, please do not. Depot staff or volunteers will take the milk from your car directly.

At our main location in downtown OKC, we will be meeting you downstairs and taking the milk directly from your car. Please do not exit your vehicle.

Depot location contact information can be found in your donor packet. The same information is listed below.
